

bp Glass Garage Doors & Entry Systems, Inc.

Storefront Garage Combo Line (US & Intl. Pat.)

bp manufacturers Glass Garage & Matching Entry Doors (in combination), to comprise our **bp Storefront Garage Combo Line**. This Architectural blend focuses on Form and Function, allowing the end user to implement an operable window wall, or limit access to just an entry door... All while sealing the bldg. envelope.

The **bp NFRC Air Resistance Package** provides an airtight seal; where building energy code compliance is required. bp Glass Doors have been tested and certified as a “whole system”, and not just glass alone. The **bp “Fully Insulated Frame Technology” (US & Intl. Pat.)** is the key component for eliminating air leakage, when using Full Vision Type Doors to seal the building envelope, or any HVAC climate-controlled space... Our products far exceed the allowable resi. & com. standards.

28ft wide x 16ft high (max.)
